SUMMARY

Builds reliable LLM products around real data: a governed analytics agent at Coca-Cola, an open-source RAG evaluation harness, and a competition policy that placed 245th of 6,807 teams (top 3.60%).

EXPERIENCE

The Coca-Cola Company

May 2026 - Aug 2026

Global Human Insights Intern, Ignite Program

Atlanta, GA

- **Built a governed analytics agent for a non-technical insights team:** Azure OpenAI converts a plain-English question into a query plan and a deterministic Python engine computes every figure over a 25-30M-row SQL Server backend, so results are reproducible rather than model-generated.
- **Replaced a DuckDB/Streamlit prototype with live Azure data** under strict metric contracts, then analyzed five years of consumer data across 200 markets in SQL and DAX for recurring reporting.
- **Grew the agent's regression suite from 9 to 179 passing tests** and built a routing eval on 24 real business questions (92% accuracy); 50+ checks reconciling Excel, Power BI, and Python stop the run on any disagreement.

Quadcore Innovations

Oct 2025 - May 2026

Operations Improvement Analyst, Nuff Cash fintech platform

- **Moved two of three identified bottlenecks onto the product roadmap** and replaced a manual weekly reporting cycle with automated SQL reporting feeding four Tableau dashboards.

SELECTED PROJECTS

TYCHO tarang-tj.github.io/tycho

Live | Sep 2026

- **Built a browser rover teleoperation simulator** on real NASA/USGS elevation data for 7 Moon and Mars sites with the real lunar signal delay; a Monte Carlo dry run scores Mars plans, and delayed-telemetry bots must win every level.

Pokemon TCG AI Battle Challenge [Kaggle](https://kaggle.com)

245 / 6,807 (Top 3.60%) | Aug 2026

- **Trained a gradient-boosted decision-tree policy** through imitation learning and self-play, placing 245th of 6,807 teams (top 3.60%); rejected four candidate improvements as measured nulls, tracing an apparent 11-point gain to a shared-import artifact.

SyllabusAI syllabusai.net

Live | Mar 2026 - Present

- **Built and run a free ed-tech tool:** syllabus-to-calendar parser plus an AI study companion on Claude across six surfaces, per-user cost ceilings; React, Express, Supabase, 1,055 tests.

ragproof github.com/tarang-tj/ragproof

Jul 2026

- **Built a RAG evaluation harness** with retrieval, faithfulness, relevance, cost, and drift metrics; a bge-small dense retriever reached NDCG@10 0.72 vs. 0.56 for untuned BM25 on BEIR/scifact. Pluggable BM25, dense, and hybrid retrieval with cross-encoder reranking; 54 tests, Docker, and green CI.

Message Notification Router [HackerRank](https://hackerank.com) [Orchestrate](https://orchestrate.dev)

#14 of 1,983 | Aug 2026

- **Routed 110 multimodal messages** to notify, digest, or mute in a 24-hour hackathon using deterministic context assembly, transcription/OCR, and validated LLM output; achieved 30/30 action-label evaluations.

career-ops github.com/career-ops-hq/career-ops ([open source](#))

Aug - Sep 2026

- **Merged 10 pull requests** into the open-source career-ops project: tracker, dashboard, updater and agent-inbox fixes, a setup quick start, and a user-layer test.

TECHNICAL SKILLS

AI/LLM: LLM evaluation, RAG, semantic retrieval, reranking, embeddings, prompt engineering, Claude API, Azure OpenAI, SSE streaming

Engineering: Python, SQL (PostgreSQL, SQL Server), TypeScript, JavaScript, FastAPI, Next.js, React, Node.js, REST APIs

Quality/Infrastructure: Docker, GitHub Actions CI/CD, pytest, Git, Azure, Supabase, Vercel, data validation

EDUCATION

University of Washington, Bothell

June 2027

B.A. Business Administration, Management Information Systems; minors in Data Analytics and Economics

Microsoft Certified: Power BI Data Analyst. HarvardX CS50AI (Intro to AI with Python). Anthropic AI Fluency. Dean's List 2024, 2025, 2026.

LEADERSHIP

- **Treasurer, UW Bothell Club Council** (2026-27): \$200K+ annual allocation across 95+ organizations. **President, Delta Sigma Pi** (2025-26): led an 80+ member chapter to 20% growth; Collegiate Member of the Year, 2026.
